Summary

Full-stack developer with experience in building scalable web applications and integrating AI-driven features. Strong foundation in data science and machine learning, with hands-on experience in backend systems, frontend development, and production deployment.

Experience

Software Engineer (Ruby on Rails) / Full Stack Developer – PromptCloud (Jul 2022 – Jan 2025)

- Developed and maintained data-driven applications including CrawlBoard and Jobspiker
- Migrated Ruby on Rails monolith to API + React architecture
- Built frontend components using React.js and integrated APIs
- Worked on backend systems with Ruby on Rails and data processing

Machine Learning Intern – Zargun Electronics & Science (Feb 2021 – May 2021)

- Designed predictive algorithms for waste management systems
- Trained ML models and performed image data analysis
- Worked on data cleaning, annotation, and validation

Projects

Reflectly – AI-Powered Journaling App

- Built full-stack app using Flask, PostgreSQL, and Jinja
- Implemented AI analysis (summary, tone, distortions, reframing)
- Developed weekly insights system with cron automation
- Built mood tracking, habit tracking, and task system

Education

PG Diploma in Data Science – Amity University (2020)

IBM AI Engineering – Coursera (2020)

PG Certification Full Stack Development – UpGrad (2022)

BE Information Technology – MIT Pune (2017)

Skills

Python, JavaScript, Flask, Ruby on Rails, React.js, PostgreSQL, Git, OpenAI API
